MANISH GANDHI

Director & COO
ABEC Exhibitions and
Conferences Pvt. Ltd.

It gives me great pleasure to welcome you to the 8th Edition of Secutech India and 4th Edition of Fire & Safety India.

Security and safety are considered as one of the most important sectors as it involves not only an individual's security but also securing and safeguarding important locations such as airports, railways, public places, border checkpoints, government and private organizations, among others. A strong increase in the unethical and unlawful practices in India and the world alike is aptly visible and the only control is use of advanced security and technology products aiding security screening.

In the year 2019, grave security challenges in businesses and infrastructure alike including fire breakouts, cybercrimes, data theft, terrorist attacks, financial crimes and unforeseen environmental disasters have been faced.

The ever evolving consumer and industry needs have initiated a new market for better and smarter security and fire safety solutions. Today security and fire safety challenges are becoming increasingly complex and are marked on the top of the agendas of politicians, business leaders, corporate houses, hotels and hospitality industry and many other trades too.

ABEC - ITE along with Messe Frankfurt are pleased to present to you Secutech India 2019 and Fire & Safety India 2019; an exposition where security and fire safety system integrators, end-users and consultant communities think beyond the core security challenges and together search for smarter solutions and better products.

The annual exhibition this year is expected to be one of the largest turnouts of global and regional players from the booming security and fire safety market. This exhibition is strategically planned to showcase the full spectrum of the latest products, technologies and solutions on the offer in the industry.

Multiple allied events and networking activities like Secutech Connect, Fire & Safety Connect, Secutech India Conclave, Fire & Safety India Conclave, Technical Workshops and Secona Shield Awards form the core of the exhibition as the previous years. This year we introduce 'Fire Safety Volunteer Training' a comprehensive practical course specially designed for corporates and is an initiative by Maharashtra Fire Services and Fire & Safety India. At the 'SMAHome Pavilion' we are set to display designed smart home products related to security & building automation.

I take this opportunity to thank and express gratitude to all our key partners, exhibitors, visitors, associations and media partners for their continuous support and trust in this endeavor. I wish everyone three days to network, engage and conduct business discussions and have a rewarding time at SECUTECH INDIA 2019 and FIRE & SAFETY INDIA 2019.

MANISH GANDHI

Director & COO, ABEC Exhibitions and Conferences Pvt. Ltd.

It is my great pleasure to welcome you to the 8th edition of Secutech India, the leading business hub for India's commercial security and fire safety sectors.

The show's location in Mumbai, India's commercial centre, is the ideal setting for the industry to come together, network, exchange information, and explore new avenues for cooperation. This year we are welcoming over 100 exhibitors to 15,000 sqm of exhibition space, including both international and domestic players. The growing presence of indigenous manufacturers shows the growth and the potential of the local security market.

The products offered by these companies are both technologically advanced and unique to the demands of the Indian market. India has witnessed a tremendous boom in investment in infrastructure and construction in verticals such as oil and gas, property development, construction, transportation, hospitality and government. All offer significant business opportunities for the regional industry.

Fitting the demands of these verticals, solutions displayed at this year's fair include the latest access control systems, surveillance systems, biometrics, perimeter security systems and much more. In addition to this, the concurrent Fire and Safety India event will deliver the most in-demand products for India's growing fire safety market, including firefighting and rescue equipment, detection and alarm systems as well as fire protection solutions for high rise buildings and industrial parks.

Last year, we welcomed over 18,000 professional channel buyers and we are expecting an even higher turnout at this edition. I encourage all to also participate in our comprehensive fringe programme of educational seminars and events which cover the security industry's key challenges combining people, processes and technologies.

My thanks go to Asian Business Exhibitions and Conferences Ltd, whose efforts and support have contributed significantly to the success of the show. I would also like to thank all exhibitors, supporting organisations, and trade visitors for placing your trust in Secutech India. I wish you all the best of business during the course of the fair.

HUBERT DUH

HUBERT DUH

Chairman and Managing Director
Messe Frankfurt new Era Business Media Ltd

KERSTIN HORACZEK

Group Show Director
Messe Frankfurt Exhibition
GmbH

On behalf of Messe Frankfurt, welcome to the 8th edition of Secutech India.

Covering the Middle East, Europe, Asia, and South America, Messe Frankfurt's global safety, security and fire trade fairs are first class business hubs for the world's dynamic growth regions. With a population of almost 1.4 billion, the potential for security industry growth here in India is vast; and Secutech India serves as an effective gateway to the market.

Over recent years, security awareness has grown. This is the result of greater availability of technology as well as the introduction of new codes, rules and regulations by government authorities. Reviewing the show's progress over the years, it is fascinating to see how an initially nascent market grew to be strong and technologically advanced with more product categories entering the market to answer clients' demands. One such example is the smart home and intelligent transportation fields which are growing, and are reflected on the show floor this year.

Secutech India is happy to once again host the SECONA shield awards. The awards acknowledge the hard work, commitment and innovations of consultants, integrators and end user in the security and fire safety sectors. It is an opportunity to bring together the fraternity of the security industry and to accolade both new comers and old-timers for their contribution to a better, safer society.

As can be seen, there is plenty on offer across the board at this year's show. With this in mind, I warmly encourage all participants to make the most of their time during the fair and gain as much value from a networking, information gathering, and business exchange standpoint.

KERSTIN HORACZEK

Group Show Director
Messe Frankfurt Exhibition GmbH

Secutech India and Fire & Safety India is on a pedestal growth to become India's premier security & safety trade show. With fire safety and security as a prime factor for creating a smart and safe environment for the proposed smart cities and the existing infrastructure, it definitely is a promising time for the technology providers in India and an opportunist future of the Indian security and fire safety industry is in the horizon.

At Secutech India and Fire & Safety India, we constantly look for innovating approaches to ensure the needed Return on Investment (ROI) and Return on Time Invested (ROTI) of our exhibitors, participants and key partners.

Over the next three days, I am sure the visitors will witness the latest technologies and products from the security, safety and the fire protection domain. New product launches and an array of innovative solutions will be at demo for the clients from all industrial sectors to observe and find solutions for their security and fire safety needs.

This time around, in addition to the past exhibitors there are several new companies taking advantage of the space for greater opportunity to network and make bigger business happen. Each exhibitor is sure to make a significant improvement to their profitability.

To all our Exhibitors, Visitors, Partners and Media – both new and longtime supporters; I wish everyone an inspiring and beneficial week that puts you firmly on track to an even more successful year ahead. Secutech India looks forward to create long term relationship with its exhibitors.

Thank you for supporting us and hope you enjoy the show.

Secure your Premises with Smart Biometric Products

Facial Recognition

Overall with low light verification tech camera for variation in the brightness of the area, superb performance due to high tech processors, heavy duty hardware thats rough and tough and stylish elegant look these are built with expertise to be used and maintain records for thousands of employees. These Multi Bio devices are user friendly, up to the mark in detection and reliable source for the companies.

Advance Fingerprint sensor can work with presence of any colored substance on the finger as well as Wet, Rough or Dry finger also. Built with precision, we deliver you the up most systems , algorithms that eliminates any breach to access system. From Attendance, Access Control, to Counter with Anti-Passback is packed within this device gives an authentic look.

Finger Recognition

Palm Recognition

Palm technologies are quite different when it comes to verification and speed. It has lower FRR and FAR, thus Palm biometrics is more accurate. Palm Technology the size of biometric templates is larger and upto the mark. As there is no risk of duplication or theft, palm technology has higher security. As per nature of their work individuals fingerprint may be damaged. However the accuracy or readability of palm is not affected.

ASSA ABLOY INDIA

Assa Abloy AB is a Swedish lock manufacturer, and is the world's largest lock manufacturer by sales volume.[4] Assa Abloy was formed in 1994, when Assa AB was separated from Swedish security firm Securitas AB. Shortly thereafter, the Finnish high security lock manufacturer Abloy Oy (a subsidiary of the Finnish company Wärtsilä) was acquired.

The company was introduced to the Stockholm Stock Exchange later the same year. Assa Abloy has since made over 150 acquisitions.[5] A few of these are Yale lock, Sargent Manufacturing, and the high security lock firms of Medeco in the United States, Mul-T-Lock in Israel, Fichet-Bauché in France, and VingCard Elsafe International in Norway. Its two largest shareholders[6] are Latour and Melker Schörling AB.

Commenced in the year 1937 we MRH Sound Solutions Pvt. Ltd (formerly MRH Digital Systems Pvt. Ltd) is one of the trustworthy conglomerates affianced in catering the plethora of products at the client end. We were successfully running our business at Hyderabad Sind under a different name, and moved to its current address at 290, Lamington Rd, Mumbai, since 1956. The company office operates from the 1st and 2nd floor and also has a warehouse at Vasai. The company has witnessed overwhelming success under the valuable guidance of experienced two directors. They possess the vast knowledge in the electronic field. We were the authorized dealer and distributors for international brands like Philips, Shure, QSC, JBL, and AKG. In the present scenario MRH is a dealer for Bosch (Security System Division), EV (Electro Voice) professional audio products encompassing Dynacord Mixer & Telex, Mipro Wireless PA systems & wireless microphone systems. Our plethora of products envelopes Plena amplifiers, Dynacord audio mixers, ceiling speakers, conference systems, industrial communication systems, electro voice live X, Mipro wireless Mic receivers, Mipro wireless PA systems, public address and voice alarms and Praesideo voice evacuation system. Since the day of commencement, MRH qualified company-trained service engineers are executing turn-key projects for the security systems with utmost precision. Apart from that we also render annual maintenance services. For the hassle free performances, we continuously create innovative business solutions and undertake consistent research & development activities to provide innovative solutions to our customers. With our hard work and dedicated efforts, we are able to cater our products in every hook and corner of the country.

"Single Point Contact for complete Biometric & Entry Automation Solution"

OUR MISSION: Our mission is to provide right product at right time with end-to-end solution that is supported by able customer support.

OUR TEAM: Development Team - Our development team is responsible to develop new software solutions and performs all customizations demanded by the clients in existing software. Helpdesk Team - We have a very capable helpdesk team and experience to provide quick solutions to the client and react in shortest possible time.

OUR USP LIES IN THE FOLLOWING:

- All Hardware UL & CE Listed, in accordance with International Standard & Quality.
- In House Software Development (used by all major system integrators and end users).
- Providing the best product in Economical prices

Fire Safety is not a matter of choice.

People in India who live and work in high rise buildings coming all across the metros today presume that their building is not just structurally safe but also has adequate safety measures built into it to protect their lives and those of their family who occupy them, in the event of an unfortunate fire accident in their building.

Glass Flam FSI LLP brings to India a range of products tested as per EN and UL standards, manufactured by world leaders like FSI Ltd, UK and METEK, Italy to help the architects and developers build projects which will adhere to all international specifications on fire safety. These products help in isolating the fire and noxious smoke from spreading to other zones within the building thus giving adequate time to the occupants to evacuate safely without panic thus giving the active fire system installed in the building adequate time to douse the fire.

REALTY AUTOMATION & SECURITY SYSTEMS

“Vighnaharta Security™” is a brand promoted by Realty Automation & Security Systems Pvt. Ltd. Our aim is to provide reliable electronic safety, security, surveillance & automation solutions to customers.

Our research and Development department is recognised by DSIR (Department of Scientific & Industrial Research). Realty Automation is designing and manufacturing products for A3S (Automation&Safety,Security,Surveillance).

RASS have well equipped manufacturing setup at Nanded Gaon Pune to manufacture any electronic equipment /products used in industry, military applications, commercial and residential applications.

We are the manufacturer of

- 1) Gas Leak Detectors for residential, Commercial & Industrial segment, gas detection panels.
- 2) Addressable & conventional Fire alarm panels, & Fire Suppression Systems
- 3) Intrusion Alarm panels & Sensors

We are committed to Design, Development, Manufacture and Supply of Safety, Security & Surveillance, Electronic Products & Projects with Excellent Quality & Services to our Interested Parties by Exceeds their requirements with Global Benchmarking for Market Requirement.

TATA COMMUNICATIONS

Tata Communications is operating at a pivotal moment in the evolution of human activity – the so-called ‘Fourth Industrial Revolution’. As a leading provider of global digital infrastructure services, the company provides the integrated, globally managed tech solutions that underpin the fast-growing digital economy. As businesses and societies seek new and better ways to make digital work for them, the more their inspiration and aspirations evolve. Tata Communications focuses on helping businesses understand and navigate through the vast potential offered by technologies that they have come to rely upon – such as network, mobility, collaboration and security services. Looking further out, it also shapes the future by investing in emerging trends – such as IoT, AI, automation and analytics. And it delivers all this seamlessly through the cloud, which in turn is underpinned by one of the most advanced, wholly-owned sub-sea fibre-optic networks in the world. For thousands of customers across the globe, Tata Communications sparks an infinite universe of connections in the cloud and under the seas. Its 150-year Tata heritage grounded in social responsibility, humility and impeccable integrity, coupled with its creative, keen, challenge-to-win mindset makes Tata Communications uniquely positioned to provide digital infrastructure services for enterprises, partners and service providers everywhere. Tata Communications enables its customers’ digital future today while also partnering with them, with governments and with society, to build a better tomorrow.

INDIA STRATEGIC

India Strategic is an Authoritative monthly on Defence, Civil and Military Aviation, Homeland Security, Space, Missiles, Electronic Warfare, Intelligence and International Strategic Affairs. There is particular emphasis on modernization of the Army, Navy, Air Force and Paramilitary forces. India Strategic is about Reach and Respect, and reaches the top as well as at various levels, across the board, in the Government, Armed Forces, Strategic Community and Think Tanks. India Strategic defence magazine is often quoted in the media for its exclusive and authoritative reports. Our contributors are distinguished writers, whose views are respected in the columns of newspapers and at various interactions and seminars. India Strategic is about Publishing, Websites, TV Programmes and Seminars on issues of national and international security. In 2013, we will have four seminars, the National Seminar on Aerospace Technologies (N-SAT), FirePower (on precision weapons), Navy and Civil Aircraft. Our Editorial Board has highly distinguished personalities including former Foreign Secretaries (like US Deputy Secretaries of State) and top diplomats as well as top military officers including former Chiefs of Staff and Generals. The Editorial Director, Mr Gulshan R Luthra, is a distinguished defence analyst. He has been a Member of the governing board of the Institute for Defence Studies and Analyses (IDSA), a think tank set up in 1965 by the Indian Ministry of Defence on the lines of US Rand Corporation. The India Strategic team takes pride in the authority of our reports and analyses.

OEM UPDATE

I-Tech Media is a publishing company focusing on a variety of monthly magazines for different verticals. Most of the magazines published by I-Tech Media are market leaders in India with excellent reach within their relevant industry segments. Founded in 2007, the company is led by vertical media experts. I-Tech Media is headquartered in Mumbai (India) and has a strong presence across the country and selective presence in SAARC countries. Today, some of the titles such as B2B Purchase, OEM Update, ACE Update, Electrical & Power Review (EPR) and Thermal Control Business Update are well-known, glossy monthly magazines in India. ACE Update - Premier monthly magazine for architects and construction industry professionals.

B2B Purchase - India's No. 1 monthly magazine on project procurement. The one and only of its kind – well-focused, response-driven products and services digest for buyers among the infrastructure sectors. The unique guide is also a showcase for a large variety of products, technologies and services, with a list of contact details of leading manufacturers, dealers and resellers, designed for procurement community of infrastructure projects of South Asia.

OEM Update - India's best monthly magazine on industrial manufacturing that gives complete update on OEMs. It is the India's best media source for news and content relevant to the manufacturing community focused on up-to-date products and technology development in the manufacturing sector.
