Secure your business growth

The pandemic today has changed the paradigm of both physical and digital security across the globe, introducing new augmented technology innovations that facilitate security, safety and contactless mobility.

Amid settling in the new normal and getting business back on track smoothly, commercial establishments and organisations at large are increasingly seeking advanced solutions for cloud-based operating systems, screening processors, remote surveillance and more to enable large scale work-from-home models with optimum data and network security. The growing demand of security systems in the home/residential segment, emergence of the Internet of Things (IoT), wireless technologies and increasing adoption of IP cameras for video surveillance has also seen a steady rise. Despite the current slowdown, the global access control systems market alone is projected to grow from USD 8.6 billion in 2020 to USD 12.8 billion by 2025, growing at a CAGR of 8.2% as per market reports.

The Indian market provides immense growth potential for the security industry with numerous development projects already in the fray and rising inclination towards automation and public safety. Supplementing this growth trajectory, the 9th edition of Secutech India will serve as a perfect trade platform for you to showcase cutting edge innovations, connect with the right buyers across verticals and get the industry **'Future Ready'**.

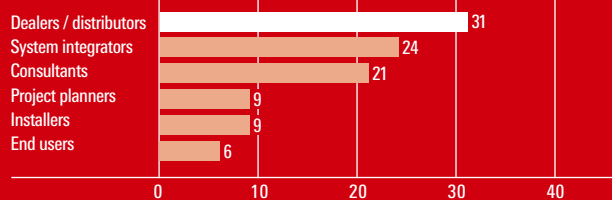

"An exhibition is one of the important marketing and customer touch points. This is a platform where we can meet all of our customers. In one go, in three days, we can get a complete picture of the market and customer requirements. It is an opportunity for us to exhibit our capabilities, capacities, new products and more."

Mr Ashish Dhakan
MD and CEO, Prama Hikvision India
